Department Name

Lawson Health Research Institute - London Regional Cancer Program

The London Regional Cancer Program fosters an exciting and dynamic research program involving the fields of cancer biology, medical physics, imaging, medical oncology, radiation oncology and surgical oncology. The Department of Radiation Oncology is seeking a temporary full-time Research Associate to work in research focusing on lung cancer, prostate cancer, and oligo-metastatic disease. The Research Associate will be part of a multidisciplinary translational research team that includes physicians and residents, imaging scientists, basic scientists, physicists, graduate students and other trainees.

The Research Associate position would be responsible for undertaking and assisting with research projects, focusing on the collection and management of clinical data, imaging scans, and biologic specimens as part of prospective studies or clinical trials. Other duties may include scientific writing for grant and ethics board review applications, preparation of journal articles, and generation of research reports. The position will be located at the Baines Centre in the London Regional Cancer Program.

Rate of Pay: Commensurate with experience

Hours of Work: 37.5 hours per week

Duration: 12 months

Qualifications

- · Successful completion of a Bachelor's Degree in Science
- Ph.D. and/or Master's Degree in Epidemiology or other health science research discipline, or Clinical Research Coordinator Certification (SOCRA, ARCP)
- · Proficient in computer applications such as Microsoft Word, Excel, PowerPoint, Access
- · Previous training in statistical methodology and data analysis
- · Previous experience working in an academic or clinical/medical research environment
- · Previous experience with clinical trial conduct, critical appraisal of scientific literature, publication in peer-reviewed journals, scientific writing for preparation of journal articles, graduate level thesis, and grant submissions, and design of clinical research studies
- · Previous experience with data collection, management of databases and performing quality assurance procedures to minimize data inaccuracies for data analysis
- · Demonstrated organizational, analytical skills and attention to detail
- Excellent time management skills
- Ability to effectively manage multiple and completing priorities
- Ability to work independently with limited supervision and in a professional manner
- Ability to disseminate findings in a clear and concise manner, both verbally and in writing to a variety of audiences
- Advanced problem solving, decision-making, planning and evaluation skills
- Ability to provide attention to detail to ensure accuracy
- Demonstrated knowledge of and commitment to the principles of patient and family centred care
- Demonstrated knowledge of and commitment to patient and staff safety at LHSC
- Demonstrated ability to attend work on a regular basis

London Health Sciences Centre fosters a culture of patient and staff safety whereby all employees are guided by LHSC's Mission, Vision, Values and Code of Conduct.

We are committed to providing a safe, healthy and inclusive work environment that inspires respect. LHSC encourages applications from persons with disabilities and we are committed to providing accommodations upon request.

Your interest in this opportunity is appreciated. Only those applicants selected for an interview will be contacted. Successful candidates, as a condition of job offer, would be required to provide a satisfactory police information check (original document) completed in the last 3 months.
