

LAWSON'S CAFÉ SCIENTIFIQUE PRESENTS

CUTTING EDGE: SURGICAL ADVANCEMENT THROUGH RESEARCH

PART II OF THE CANADA 150 SERIES

THURSDAY, OCTOBER 5, 2017

7 to 9 p.m. at Windermere Manor, 200 Collip Circle

Before the bright lights of the operating room are turned on and the surgeons and operating room staff are gowned and ready, research conducted at Lawson Health Research Institute has backed many of the surgical innovations and firsts performed at London Health Sciences Centre and St. Joseph's Health Care London. Join us to hear a panel of Lawson scientists discuss their cutting-edge work at this free community event.

Computer-assisted gastrointestinal surgery
DR. CHRISTOPHER SCHLACHTA

Transplant organ preservation: The best option may be "Stinky"
DR. ALP SENER

Hand surgery: How small advances turn into complex surgical achievements
DR. BING SIANG GAN

In celebration of Canada's 150th anniversary as a nation, this event is the second of a two-part series focusing on the future vision for health care in our country and the legacy our research will leave.

RSVP by Sept. 27: www.lawsonresearch.ca or info@lawsonresearch.com
